

<b>Question</b>	<b>Answer</b>
Is there no way of potentially strengthening and protecting the beta cells and whether that can lead to the production of more healthy beta cells?	<b>Answered live</b>
Do you have a sense of why there is apparent synergy when GABA and Lira are used together?	<b>Answered live</b>
What is the therapeutic dose for humans? How can we receive this medication?	<b>Answered live</b>
Any optical effects?	<b>Answered live</b>
My 33 y/o daughter was recently diagnosed with Wolframs. She was originally diagnosed with optic nerve atrophy, but genetic testing confirmed Wolframs. The reason it was not originally considered was due to she did not present with Diabetes. Two questions -- 1) Have you seen this in your testing?, and 2) Why male rats, are female rats also included?	<b>Answered live</b>
Have you compared it to the Dual GIP/GLP-1 receptor agonists?	<b>Answered live</b>
