SECTION 12

Examples of Forms for Clinic

CHILD AND ADOLESCENT MENTAL HEALTH SERVICES

DEPARTMENT OF CLINICAL PSYCHOLOGY
DIRECT DEPARTMENT LINE: TEL: 0121 333 8046

Birmingham Children's Hospital has a Paediatric Psychology Team delivering psychological care and consultation across the hospital. As part of the Wolfram multi-disciplinary clinics you will be offered a thirty minute appointment with a member of the team. Our role is to work with children, young people and their families where emotional factors are impacting on a child's health condition and/or its treatment.

The aim of the screening appointment is for us to assess the psychological needs of your child/young person. It will be possible for you to have some time together as a family, for you as parents/carers to have some time alone, for your child/young person to have some individual time, or a combination of the three options, whichever you feel would suit your family best.

Some families find it useful to discuss a wide range of different things, including areas such as how to discuss their child's diagnosis with them, adjustment to life with Wolfram Syndrome, the emotional aspects of adjustment to visual or auditory impairment and thoughts about their appearance. Other areas that parents have chosen to discuss include coping with medical procedures, difficulties with learning and peer relationships. Every child and family is unique and as such there may be different things that you would like to talk about.

If you would like the opportunity to talk to us about what psychology we may be able to offer or discuss issues regarding your child prior to your appointment at the clinic, please contact us on the telephone number above.

We would be grateful if you would complete the enclosed questionnaire prior to coming to clinic and send it back to us. We look forward to seeing you in clinic.

Young Person's Questionnaire

The rare diabetes team here at Birmingham Children's Hospital is made up lots of different professionals including Clinical Psychologists.

We often work with young people and their families to think about the emotional side of their condition. This might include weight management, visual impairment and the social difficulties.

Some things that young people have talked about are below. Please let us know if you have had a similar experience and would like to talk more about this:

1. Feeling different to other people my age

I'm OK with this

I would like to chat about this

2. Not being able to do things that other people my age do

I'm OK with this

I would like to chat about this

3. Finding it difficult to talk to people my age (e.g. feeling shy or self conscious)

I'm OK with this

I would like to chat about this

4. Unwanted attention or bullying from others

I'm OK with this

I would like to chat about this

5. Feeling unhappy, low in mood or anxious

I'm OK with this

I would like to chat about this

- Some young people find that their difficulties can be hard to think about or they worry that their parents will become upset (it's normal to feel like this, but it is good to talk about it)
- Your appointment with the Psychologist is a safe place to talk about how you feel
- You can choose to attend this appointment on your own or with your parents
- The Psychologist will think with you about ways you can cope with any problems you may be experiencing

A. Please list any other concerns that you would like to discuss

Urodynamics Department

Frequency Voiding Chart

NAME: _____

UNIT NUMBER: _____

So we can understand your child's problem, please complete the chart with care and bring it along to your appointment

- Complete the chart for 2 days. Avoid school days – use weekends and holidays
- Measure in millilitres all of the drinks which are drunk.
- Measure in millilitres the amount your child voids (wees) by using a plastic jug with millilitres on the side.
- Record the state of the pants – whether damp or wet.
- Record any bowel actions.

If you have any queries please contact the Urodynamics Department on 0121 333 9222
